REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

While Noro et al. (US 2005/0036636) teaches a portable electronic apparatus generating tactile output using multi-sine signals driving a mass, and Braun et al. (US 2002/0080112) teaches the known use of plural tactile transducers on a handheld device each driven by a sinusoid signal so that the signals are 90 degrees out of phase (i.e. preventing relative destructive interference as claimed), the references are not combinable since the tactile output of the SINGLE tactile transducer 24 of Noro (i.e. no suggestion, disclosure or teaching of STEREO music or tactile output) is derived from a music source intended to drive a SINGLE speaker 14 and the tactile transducer is to be driven in synchronization with the rhythm signal within the music data, which logically teaches away from the use of plural tactile transducers having outputs that are out-of-phase or phase-shifted since the result would no longer mimic the music source by synchronizing with the music rhythm thereby destroying the Noro et al. reference teaching. Furthermore, no other prior art, alone or in combination, sufficiently suggest or teach the claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
